

Use of BioAktiv in a poultry farm in Poland

Trial period: March - April 2009

Client: BioAktiv Evolution GmbH & DAMA Project Management.

Name & address of farm:

Gospodarstwo Rolno Hodowlane Antoni Narkiewicz Mazuchowka 92A PL- 11-510 Wydminy

	Test 1	Test 2	Control
No. of broilers	20,500	22,350	ca. 21,500
BioAktiv used as	BioAktiv-liquid	BioAktiv-liquid throughout the fattening period, plus BioAktiv für Tierfutter from the 3 rd wk	without BioAktiv
No. of fattening days	45	43	46
Average wt.	2.78 kg	2.64 kg	2.5 kg
Feed conversion	1.76 kg	1.72 kg	1.86 kg
Losses	3.60 %	2.24 %	5 %
Feed	Purchased, acidified	Purchased, own mix from 3 rd wk	own mix only

General comments:

- fewer cases of diarrhea
- lower ammonia concentration in poultry house (better air quality)
- less feed consumption
- better feed conversion
- less medication needed for support
